

How does PRP work?

Platelet Rich Plasma is a trending topic in human sports orthopedic medicine. Used for sports injuries as many wear and tear issues. Ardent's Platelet Rich Plasma Kit, is a breakthrough product for pets utilizing blood plasma with concentrated platelets that once activated accelerate the healing properties of the isolated growth factors at a fraction of the cost of traditional human treatments.

Platelets that are found in whole blood contain many healing growth factors and bioactive proteins. These bioactive proteins can initiate tissue healing, and assist with inflammation. The treatment offers an affordable all natural alternative to drugs and steroids.

A sample of blood is collected from your pet

The blood is processed in-clinic using Ardent's kit

PRP is administered to your pet to the area of need

Platelet-Rich Plasma

AN ALL-NATURAL SOLUTION
TO YOUR PET'S PAIN

E.A.S.E the pain, the all-natural way, with PUREVET PRP Therapy

Effective – Platelets provide the body with many healing and anti-inflammatory properties.

Affordable – A fraction of the cost of similar human procedures!

Safe – The procedure requires a simple blood draw and utilizes no drugs!

Efficient – PRP can be added to your pet's OA maintenance plan at the time of surgery. BEST PART - it's all a simple, same day procedure!

"Viktor was diagnosed with severe hip dysplasia and arthritis in his knee and he is only 3 years old. Thank you for giving my boy so much relief. It's incredible how fast this works! He woke up the next day acting like a kitten again."

Viktor

"I swear by PRP. This procedure was done on my Mearna, and the results were amazing. PRP is the best thing I have done for my dog."

Mearna

FAQs

What is PRP?

Platelet-Rich Plasma, or PRP, is blood plasma that contains concentrated amounts of platelets and growth factors. PRP is a non-surgical and advanced means of providing high doses of the body's own healing factors directly to the area where they are needed.

How does it benefit your pet?

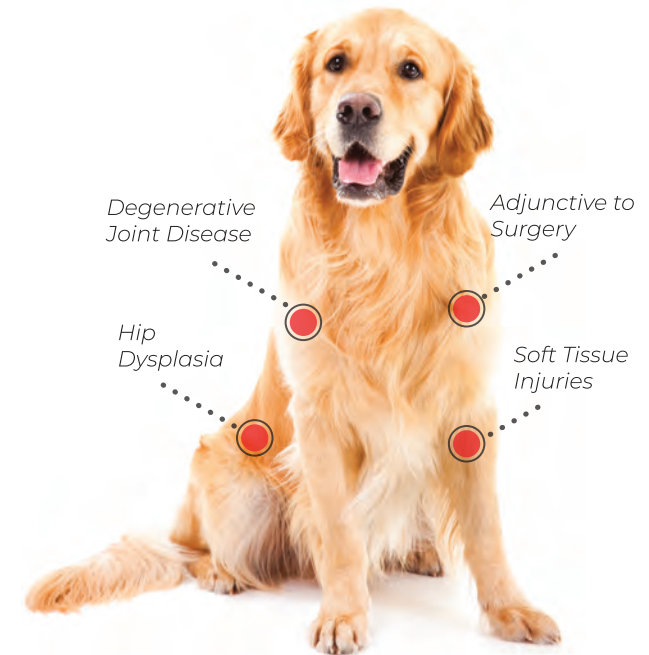

Ardent's PRP Kit can be introduced in or around an injured joint, tendon, or used in its gel form to treat large burns or wounds. Ardent's PRP is not limited to acute injuries, it can also be used for chronic conditions. Here are some common ways Veterinarians utilize PRP Therapy:

- Complementary to your pet's next surgery
- Osteoarthritis
- Tenosynovitis
- Wound Care
- General Inflammation
- Post Surgical Healing

Ardent is committed to helping pet families have access to Regenerative Medicine treatments. Contact us today to learn about payment solutions available to pet families interested in PUREVET PRP. **Give our team a call at 1.800.365.9168.**
